2. Which CLOs were addressed for this academic year? (2019-2020)

1. Apply theoretical knowledge to the care of women experiencing parturition and/or children.
2. Provide safe and competent practical nursing care for women experiencing parturition and/or children and their parents in a variety of settings.
3. Collaborate with the members of the health care team in the provision of assigned care to the women experiencing parturition and/or children.
4. Demonstrate initiative in the identification and completion of activities to assist the health care team to meet the needs of the client.
5. Demonstrate flexibility and adaptability in meeting the needs of clients and other members of the health care team.
6. Utilize effective communication skills in the provision of care to women during parturition and/or children.
7. Utilize professional verbal and written communication skills when working with the health care team to provide care to women experiencing parturition and/or children.
8. Identify the specialized legal and ethical requirements that occur in the care of women experiencing parturition and/or children.
9. Comply with all legal and ethical requirements related to care of clients in the assigned setting.
10. Function with responsibility and accountability in the care of women experiencing parturition and/or children.

3. Which CLOs are being addressed in your assessment plan next academic year? (2020-2021)

1. Apply theoretical knowledge to the care of women experiencing parturition and/or children.
2. Provide safe and competent practical nursing care for women experiencing parturition and/or children and their parents in a variety of settings.

3. Collaborate with the members of the health care team in the provision of assigned care to the women experiencing parturition and/or children.
4. Demonstrate initiative in the identification and completion of activities to assist the health care team to meet the needs of the client.
5. Demonstrate flexibility and adaptability in meeting the needs of clients and other members of the health care team.
6. Utilize effective communication skills in the provision of care to women during parturition and/or children.
7. Utilize professional verbal and written communication skills when working with the health care team to provide care to women experiencing parturition and/or children.
8. Identify the specialized legal and ethical requirements that occur in the care of women experiencing parturition and/or children.
9. Comply with all legal and ethical requirements related to care of clients in the assigned setting.
10. Function with responsibility and accountability in the care of women experiencing parturition and/or children.

4. Explain the assessment cycle.

Third semester clinical course for the traditional practical nursing program.

5. What are the assessment methods? Are they direct or indirect?

1. VSim- indirect
2. Case studies- indirect

6. What are the assessment goal(s)?

1. VSim- online assignment to practice providing safe and effective care in a virtual environment

2. Case studies- real life scenarios combined with research to better understand pathophysiology, treatments, clinical manifestations, risk factors and possible complications that could occur in the clinical setting.

7. What were the findings for this academic year? (2019-2020)

Passing grade for this course is 77%. The class average was a 94.2%. With the lowest score being a 78.8% and the highest being a 100%. 24 out of 24 students were successful in meeting the passing grade of 77%.

8. What is your analysis of the findings?

Effects of change in curriculum include increased patient care and outcomes, increased patient safety and less instances of incident reports.

9. What is the action plan for the next academic year? (2020-2021) Explain.

1. ATI (Assessment Technologies Institute) videos- to review hands on skills
2. Clinical orientation to hospital facility- to become familiar with the clinical setting prior to attending clinical rotation.
3. 12 hour clinical- apply skills learned in skills lab as well as knowledge of lecture content to care of patients in the hospital setting.
